PROFESSIONAL SUMMARY

Results-oriented Systems QA & Software Engineer with hands-on experience in designing, implementing, test automation, and scaling automation frameworks for enterprise-grade storage and data platforms. Proven ability to expand automation coverage, accelerate test execution, and enhance quality assurance and release stability through well-planned and data-driven testing strategies. Known for proactive problem-solving, effective cross-functional collaboration, mentorship, and consistent delivery of high-quality engineering solutions.

EDUCATION

Bachelor of Engineering (B.E.) – Computer Science Engineering

Nov 2020 – May 2024

PSG College of Technology, Coimbatore | GPA: 8.58 / 10

ISC – Science

May 2020

Holy Cross School, Agartala | Score: 93.75%

PROFESSIONAL EXPERIENCE

Systems Software QA Engineer – Hewlett Packard Enterprise (HPE), Bengaluru

Feb 2024 – Sep 2025

- Developed and maintained automated test suites under DTAF for **DMF**, a storage management solution using Python frameworks and Shell, increasing automation coverage from 57% to 74%, significantly reducing manual testing effort and enhancing framework scalability.
- Led performance and regression testing initiatives, reviewed test plans, upgraded test clusters, and configured environments using Ansible to ensure end-to-end coverage of test cycles.
- Collaborated cross-functionally to identify, document, and track 30+ high-impact defects and recommended feature enhancements, contributing to improved release quality and reliability.
- Validated RESTful APIs using Postman and automated scripts, ensuring data integrity and enabling scheduled, event-driven test execution and seamless service integration.
- Designed and implemented GUI test automation for **ClusterStor** using Pytest and Selenium, integrating CLI-based MDT/OST validation and reducing full test suite execution time to under 5 minutes.
- Contributed to filesystem help tab and footer verification automation, mentoring team members and establishing best practices to build scalable, reliable, and robust test pipelines.

TECHNICAL SKILLS

Programming Languages: Python, Java, JavaScript, C, Bash Shell, Kotlin

Automation & Frameworks: Selenium, Playwright, RestAssured, Pytest, TestNG, Postman, Jenkins, Spring Boot, Node.js, Express, React

Databases: SQL, MongoDB, Cassandra

Tools & Platforms: JIRA, TestRail, GitHub, Linux, Docker, Katalon Studio, Confluence, JMeter, Grafana

Soft Skills: Collaboration, Communication, Leadership, Problem-solving, Agile Methodologies

PROJECTS

Personal Finance Copilot | React, FastAPI, Ollama LLM, Playwright, GitHub Actions

Full-stack finance analytics app with React frontend, FastAPI backend, and JWT authentication. Integrated Ollama LLM for AI-powered chat and financial insights with PDF/CSV report generation. Built 130 end-to-end Playwright tests with a GitHub Actions CI/CD pipeline achieving 100% pass rate.

Movie Review API Automation | Java, REST Assured, TestNG, Maven

Built a REST API test suite simulating a Movie Review app, automating GET, POST, PUT, PATCH, and DELETE operations with status code validation, response body assertions, JSON extraction, and negative test cases against the ReqRes demo API. Dependencies managed via Maven for streamlined build and test execution.

Playwright E-Commerce Test Automation Suite | Playwright, JavaScript, GitHub Actions

Built a 92-test end-to-end automation framework using Playwright with the Page Object Model pattern, covering login, cart, checkout, and full user journey flows across Chromium and Firefox with pixel-level visual regression testing. GitHub Actions CI/CD pipeline auto-triggers on every push, runs headlessly, and publishes an HTML report as an artifact.

ACHIEVEMENTS

- AIR 590 in GATE CSE 2023 (top percentile), validating core CS strength.
- HPE Starpoints Awardee, recognized for innovation, teamwork, and project delivery excellence.
- Scored 94.11 and 98.8 percentiles in CAT 2025 and XAT 2026 respectively.
